Web Developer with 2 years of experience in personal projects and 4 fully functional websites as a freelancer. Proficient in HTML, CSS, Tailwind, JS, TypeScript, and React, and currently learning SQL. Currently pursuing a Bachelor's degree in Computer Science (second year). Seeking to contribute skills to projects and continue growing professionally.

PROFESSIONAL EXPERIENCE

New Gen Patio   **Texas, EE.UU**
FullStack Development   *Oct 2024 – Nov 2024*

- Designed and developed the company's website from scratch using HTML, CSS and JavaScript, ensuring an intuitive and modern user experience.
- Worked in constant collaboration with the client, holding frequent meetings to adjust and refine the website's design and functionality according to their needs.
- Implemented a responsive design to ensure the site was fully functional and attractive on mobile, tablet and desktop devices.
- Incorporated good code and design optimization practices to improve loading speed and user browsing experience.
- Provided the client with technical advice and guidance at every stage of the project, ensuring a final product aligned with their business objectives.
- **Notable:** Achieved a +90 score on Google Lighthouse, securing the top ranking in its niche.

Nach Barbeshop   Bs.As, Argentina
FullStack Developer   Jan 2025 – Feb 2025

- I designed and developed the barbershop's website to showcase its services, haircut styles, and exclusive men's grooming products.
- Worked closely with the client to define an attractive visual identity aligned with the barbershop's essence.
- Implemented a responsive design to ensure an optimal experience on mobile devices, tablets, and desktop computers.
- Incorporated web optimization strategies to improve loading speed and enhance user navigation.
- Provided technical guidance and ongoing support to ensure the website met the business objectives and delivered an exceptional user experience.

Devicethread   **EE.UU**
FullStack Development   *Jul 2024 – Dec 2024*

- I completely revamped the company's website, modernizing its design and functionality to improve the user experience and attract an international audience.
- I redesigned the interface using HTML, CSS, and JavaScript, ensuring a professional look and feel and intuitive navigation.
- I optimized the website's performance, achieving significant improvement in loading times and usability on mobile and desktop devices.

- I implemented specific features for the US and Indian markets, adapting the design and content to the cultural and business needs of both regions.
- I worked closely with the marketing and development teams to align the site's design with the company's business goals.
